Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 28-37, drawn to reflector for a reflector having a mounting pin extending from another portion of said edge of said reflector for adhesion within a hole in said precision optical device, classified in class 359, subclass 871.
- II. Claims 11-27, drawn to a precision optical device, classified in class 359, subclass 856.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed does not require the particulars of the subcombination as claimed such as a mounting pin extending from another portion of said edge of said reflector for adhesion within a hole in said precision optical device. The subcombination has separate utility such as a reflector having a mounting

pin extending from another portion of said edge of said reflector for
adhesion within a hole in said precision optical device.

Because these inventions are distinct for the reasons given above and the
search required for Group I is not required for Group II, restriction for examination
purposes as indicated is proper.

During a telephone conversation with Mr. Michael Gilman on 1/15/04 a
provisional election was made without traverse to prosecute the invention of Group I,
claims 1-10, 28-37. Affirmation of this election must be made by applicant in replying to
this Office action. Claims 11-27 are withdrawn from further consideration by the
examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Allowable Subject Matter

Claims 1-10, 28-37 are allowed.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes
and/or additions be unacceptable to applicant, an amendment may be filed as provided
by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be
submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Michael Gilman on 1/15/04.

The application has been amended as follows:

a) cancel claims 11-27.

REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest a mounting pin extending from another portion of said edge of said reflector for adhesion within a hole in said precision optical device as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
